DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-5,14-17,29-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raab et al(US 5,751,967) in view of Birnbaum(US 5,797,128).

Claims 1,4,5,14,16,17,29-32: Raab's patent discloses a policy system for receiving a definition of a high level policy for the configuration of the computer system and permitted refinements to that policy, the definition referring to a plurality of the entities in (fig.3,4). Raab's patent discloses an entity memory for storing information about the computer system and its environment including the entities, the hierarchy thereof and not-hierarchical relations between the entities in (fig.2 and col.2,lines 29-64). Raab discloses a processor coupled to the policy system and the entity memory and operable to refine the high level policy definition with reference to the permitted refinements thereto and the stored information about the entities to which the high level policy definition relates in order to produce a refined policy definition deployable on the computer system in (col.2,lines 12-59;col.13,lines 64-67;col.14,lines 1-7 and fig.3,4). Raab does not specifically disclose refinement including adding details to the high level policy definition. Birnbaum disclose refinement including adding details to the high level policy definition in (col.4, lines 47-60). It would have been obvious to person of ordinary skill in the art at the time invention was made to add details to the high level policy definition in the refinement as taught in Birnbaum with policy system disclosed in Raab in order to fully meet various types

of configuration or threats so that system can be fully protected against unwanted modification/attacks.

Claims 2-3,15: Raab does not specifically disclose a user interface with which a user can interact with apparatus. Official notice is taken that user interface such as GUI is well known in the art. One of ordinary skill in the art would have been motivated to employ user interface in order for user to quickly and easily view,manage and interact with related apparatus thus making user's task more efficient

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 11-12,22-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Birnbaum(US 5,797,128).

Claims 11,22-23: Birnbaum disclose a policy system for receiving a policy for the configuration of the computer system in terms of a policy context referring to unbound entities and a policy statement in (col.3,lines 13-22). Birnbaum disclose ab entity memory for storing for each of the unbound entities a pointer to data in the computer system representing at least one instance of that entity and a rule memory for storing rules for interpreting the policy statement as instructions executable by the computer system in (fig.1c;col.5,lines 40-59). Birnbaum disclose

Art Unit: 2135

a processor which is operable with reference to the pointers to bind the unbound entities in the policy context to instances of those entities and with references to the interpretation rules to interpret the policy statement into a series of instructions to the computer system referring to the bound instances or derivatives of them in (col.4,lines 27-60).

Claim 12: Birnbaum disclose processor is operable to determine a group of the bound instances and at least one of the instructions refers to such a determined group in (fig.1c,2).

Allowable Subject Matter

3. Claims 8,20,21,27 are allowed.

Claims 8,20,27: Prior art of record does not teach a library of policy templates each template including a respective such high level policy definition and respective such permitted policy refinements, the library being coupled to the policy system and a desired one or more of the policy templates being selectable by the user via the user interface for supply to the means policy system.

Claim 21: Prior art of record does not teach the refined policy being in terms of a policy context referring to unbound entities and a policy statement;stored information about at least some of the entities relates to abstract entites, and includes for each such abstract entity, a pointer to data in the computer system representing an instance of that abstract entity.

Claims 6-7,9-10,24-26,13,28,18-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Amendment

4. Claims 1-32 are pending. The previous grounds of rejection based on the Raab patent is withdrawn in view of Applicant's amendment filed 8/25/2004. However,newly discovered prior

Art Unit: 2135

art has necessitated new grounds of rejection. The new grounds of rejection are presented above.

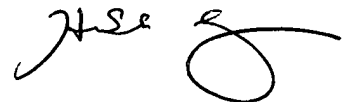

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hosuk Song whose telephone number is 571-272-3857. The examiner can normally be reached on Tue-Fri from 6:00 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Vu can be reached on 571-272-3859. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
